I have always loved the Stratocaster guitar! I got my first one in 1964 when I was 15 years old. I've owned about half a dozen since then, and have played every kind of music with them! But the tone I have always liked best is at low volume, played sweet and clean using just a vacuum tube model Fender reverb amp. These songs were chosen special because they work so well with this guitar and amp dialed into that tone. Of course, I'm also dialed into it!
